NEW! FlexPerf

Euroscreen® is proud to present a completely new projection screen surface in its product range - the FlexPerf surface with microscopic perforations which create a sound transparent projection surface. Page 7.

NEW! Control Box

The Control Box is a multifunctional unit for easy and trouble-free operation of electrical projection screens. 1 single box provides no less than 5 possible control options. Page 36.

NEW! ReAct 2.1

Euroscreen's superior screen surface ReAct has been upgraded. The surface presents an excellent viewing experience even with bright light in the audience area. Page 7.

Table of contents

euroscreen®

Euroscreen® stands for high quality and customised AV products manufactured in Sweden. Within the brand you find a large choice of products with the heart set on complete solutions of projection screens in public environments, business areas and home installations. We fine-tune our products to fit your needs, while maintaining short lead times, high quality and competitive prices.

In January 2013 our production and office moved in to new facilities located nearby the Halmstad harbour. The building had been optimized to fit our specific needs as it holds 5000 sqm of production and warehouse, and a 2-level office area with an inspiring showroom area.

Euroscreen® products are developed and manufactured by Draper Europe AB. Our aim is serve you in the best way possible. If you have any questions or just want to share your views with us, please feel free to contact us.

Euroscreen® offices with sales representatives are located in:
» Halmstad, Sweden
» Stockholm, Sweden
» Haarlem, the Netherlands
» Corby, United Kingdom
» Spiceland, IN, USA

Euroscreen® offers a broad range of projection screens in standard sizes with high quality features and smart designs. In addition, we offer custom projection screens for your specific needs. Choose a custom height, width, screen surface, or even custom printed graphics for unparalleled options in selecting your projection screen. We encourage you to read the guidelines below to make sure you choose the best projection screen for your unique application.

Audience Area

The audience area can help you identify what type of projection screen is right for your unique installation. Euroscreen® has a wide product range and offers the following projection screen types:

» Roller projection screens, manual or electric where the latter is most popular, and Tab Tension, for installation either in the ceiling or the wall.
» Fixed frame screen for a permanent installation on wall
» Portable projection screens for installations that will be transported or built up and torn down frequently.

In determining the correct screen size in relation to the audience area, the goal is to make the screen large enough so those in the rear of the audience area can read the subject matter easily, but not so large that those in the front of the audience area have difficulty seeing the full width of the projected image.
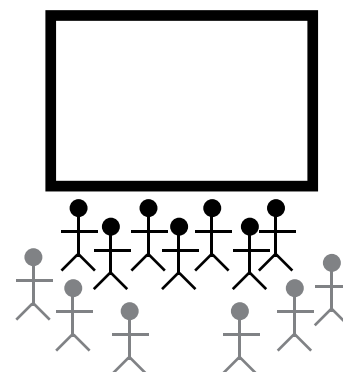

Screen Size

One of the most important decisions in projection screen selection is to determine the size of screen based upon the dimensions of the audience area.

Width
The general rule to be applied is that the screen should be of a width that is 2/3 the distance between the screen itself and the front row of the audience. Put in another way, the closest people should be 1.5 times the width of the screen distance. If the audience is large in number the rule is that the screen width should be the total distance divided by five.

Viewing Height
The bottom of the screen should be approximately 100-120 cm above the floor in a room with a level floor and several rows of seats. In rooms with theatre seating or only one or two rows, such as a home theatre, the bottom of the screen should usually be 60-90 cm above the floor.

Try to make sure that the lower part of the screen will be visible from all seats. Extra drop may be required to position the screen at a comfortable viewing level in a room with a high ceiling.

Height
Screen height is generally determined by the width of the screen and the projection formats to be used.
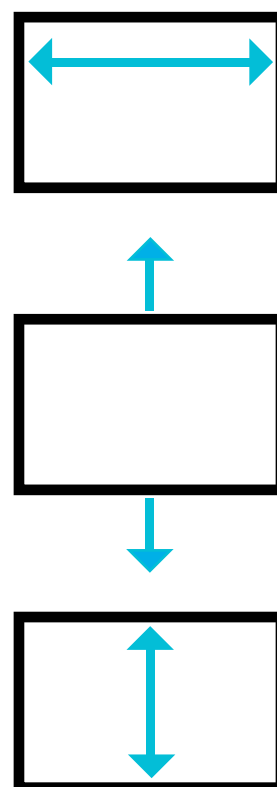

Projection Format

Once you have determined the correct size of screen for the audience area, that size may be modified based upon the type(s) of projection equipment to be used. If the screen will only be used with one type of projector, it is easy to determine exact screen dimensions based upon the projection format of that projector. Projection formats are expressed in terms of aspect ratio, which is the relationship of the width of the projected image to its height. Euroscreen® also offer several projection screen models in Nordic projection format, where the height is taller than the width.

| H>W NORDIC | 1:1 | 4:3 | 16:10 | 16:9 | 2.35:1 |
| | | Part No. -V | Part No. -D | Part No. -W | Part No. -C |

Projector Performance

The projector's performance is also a highly significant factor to determine what type of screen and screen surface will be used. For a Full HD or a Short Throw projector it is extremely important a perfectly flat viewing is area is obtain to perform as intended. Therefore these high technology projectors are used with a fixed frame screens with a permanently tensioned viewing surface, or Tab Tension screens where the adjustable tensioning system provides a flat surface.

Screen Surface

The projector makes the image, but it is the screen surface that shows it. We cannot stress enough how important it is to have the correct screen surface in every unique application for you to get the best and most out of your money. Your selection of screen surfaces is essentially based upon what type of projection screen you have concluded would be the best option for your application. In some cases the type of screen might be altered due to a specific screen surface wanted and this surface might not be a compatible alternative with the type of screen first chosen.

Basically there are two types of screen surfaces; the *unsupported vinyl* which is characterised by its flexible qualities and the *textile backed* with its reflective front surface laminated to a woven textile base.

The tensioned unsupported vinyl screen surfaces, whether for front or rear projection, need to be correctly tensioned to achieve sufficient flatness to perform properly. These surfaces are used on fixed frame and Tab Tension screens, which provide the necessary support.

The non-tensioned textile backed screen surfaces are used on spring-roller operated and motorized projection screens. The screen hangs suitably flat by virtue of the dimensional stability of the material and the weight of the dowel in the bottom of the screen.

As a general rule a white screen surface is used when most of the surrounding lights can be blocked out. The white areas of the projected image are shown as truly white, and the colours are authentically reflected on the screen surface.

However, in many cases it can be difficult to block out all surrounding light, and therefore a grey screen surface might be a better choice. A grey screen surface enhances the darker image areas even when ambient light sources tend to make it brighter, and a better contrast between colours and black/white is perceived. Euroscreen® ReAct II is the superior high contrast surface and is an outstanding choice for projection in ambient or even bright light environments. ReAct II is a tensioned screen surface and available in fixed frame and Tab Tension screens. It is suitable for any installations such as home theatre and business application.

Non-tensioned Screen Surfaces

The reflective surface of the front projection screen is laminated to a woven textile base which provides the necessary dimensional stability so the screen fabric will operate satisfactory on a roller. Materials of this type are used on spring-roller operated and motorized projection screens. The screen hangs suitably flat by virtue of the dimensional stability of the material and the weight of the dowel in the bottom of the screen.

PVC FREE

Xpert

Euroscreen® Xpert surface is 100% PVC free, and is manufactured without using hazardous substances. While it is a more environmentally friendly viewing surface, Xpert does not sacrifice quality and effectiveness. Provides excellent viewing flatness and colour rendition (colour temp. 6430 K). Supplied with a white black-out backing for superior blocking of incoming light from behind. Gain 1.0. B1 flame retardant rating.

REACH
The new EU chemicals legislation
ECHA

Arctiq

Euroscreen's standard matt white surface with fibreglass support and black-backed. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0. Requires control of ambient light in the audience area. Suitable for "wear & tear" installations, such as public restaurants and pubs. Washable. Flame and mildew resistant.

GREENGUARD

REACH
The new EU chemicals legislation
ECHA

GreyLight

Matt light grey front projection surface, fibreglass supported and black-backed. It diffuses projected light in all directions, so the image can be seen from any angle. Performs well in ambient light condition. Gain 0.75. Same base construction as Arctiq, with the same toughness against "wear & tear". Washable. Flame and mildew resistant.

REACH
The new EU chemicals legislation
ECHA

Astranova

A white, black-backed front projection surface. For use with some of Euroscreen's larger projection screens. Thickness 0.57 mm. Provides a flat viewing surface. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0.

REACH
The new EU chemicals legislation
ECHA
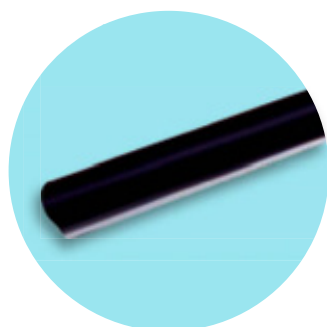

Do-It-Yourself

Euroscreen® offers screen surfaces as screen fabric only - Do-It-Yourself – where the fabric is cut to desire size and delivered on a roll. See chart on page 8 for surfaces available as Do-It-Yourself.

Audio Visual Equipment

Tensioned Screen Surfaces

This type of screen surface consists of the vinyl reflective surface only, with no textile backing. Transmissive rear projection surfaces are also available. These screen surfaces, whether for front or rear projection, need to be tensioned to achieve sufficient flatness to perform properly.

NEW!

REACH
The new EU chemicals legislation

FlexPerf

Euroscreen® is proud to present a completely new projection screen surface in its product range. The new FlexPerf surface is a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. Home theatre enthusiasts find a new best friend in the FlexPerf surface since speakers can be placed behind the screen without any compromising with the audio quality. No compromising with the picture quality either since FlexPerf's white front projection surface provides a complete viewing experience with full contrast and accurate colour rendition. Gain 0.8

REACH
The new EU chemicals legislation
ECHA

ReAct 2.1

Euroscreen® is glad to be able to introduce the 2.1 version of ReAct. ReAct is a superior screen surface that presents an excellent viewing experience even with bright light in the audience area. The structure and finish of the silver grey material boost colour contrast and black levels in the projected image (colour temp. 6508 K). Ensures an excellent flat viewing surface. Full HD compliant. Gain 1.0.

REACH
The new EU chemicals legislation
ECHA

FlexWhite

Pliable matt white surface which provides excellent flat viewing area and superb colour rendition (colour temp. 6565 K). Full HD compliant. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0.

The black-backed FlexWhite M1 presents same high quality features, and in addition to its M1 fire resistant rating also allows less light to pass through from behind the screen.

REACH
The new EU chemicals legislation

FlexRear

Neutral grey rear projection diffusing surface allows placement of projector behind the screen. Provides high resolution and excellent contrast even in ambient light. Gain 2.5.

GREENGUARD Children and Schools SM certified, meeting the strictest standards and contribute to healthier indoor air quality for school age children.

REACH
The new EU chemicals legislation

REACH controls the registration, evaluation, authorisation and limitation of chemicals. All Euroscreen® screen surfaces are approved by the REACH regulation.

ECHA

European Chemicals Agency (ECHA) gathers information on chemical substances. All Euroscreen® projection screens are printed with colours approved by ECHA.

In the chart below each screen surface available for each Euroscreen® screens are listed - your easiest guide to all screens and screen surfaces combinations!

Projection Glossary

Ambient light rejection properties
The screen surface ability to perform well under normal to adverse audience lighting conditions.

Aspect ratio
The ratio of image width to image height., formatted for the desired projection source (e.g. 4:3, 16:10, 16:9 and 2.35:1).

Brightness
Overall light output from an image. While a brightness control can make an image brighter, it is best used to better define the black level of the image.

Contrast
The screen surfaces ability to accurately reproduce and differentiate light and dark characters and backgrounds, or light and dark areas of an image.

Gain
As it applies to projectors, gain is the measurement of a projection screen's light reflectance with unity gain being one. A high gain screen will reflect more light along a narrower path than lower gain screen. Screen gains under one use a gray screen to absorb ambient light to help maintain contrast ratios.

Resolution
The clarity of the projected image.

Short Throw Wall Mount Projector
A projector that mounts on a wall adjacent to the projection screen. The throw distance is generally just a few inches and allows people to move freely through the room without concern of intercepting the light path.

Tab-Tensioned
A projection screen type that has connections on all sides of the screen material, which pull it taut in order to have a flat screen surface.

Uniformity
The screen's performance when viewed from various points off the projection axis (both horizontally and vertically), and when the brightness of the center of the image is compared to the corners.

Made in Sweden
Products with this symbol are designed and manufactured in Sweden.

Soft&Quiet - manual
A feature that retracts the surface slowly and smoothly into the case, slowing even more as it approached its upper limit. Prevents potential damages to the screen/screen surface through repeated impact with the case.

Quiet Motor - electric
Optional professional feature for electric screens which are equipped with high quality tubular Quiet Motor which reduces the motor noise by approx. 20%. It's make a huge difference compared to standard motors.
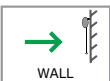

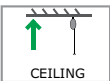

Wall/Ceiling Installation
The symbol indicates the installation required for the screen model.

Portable
The screen is portable and no permanent installation is needed.

Installation
The screen is supplied with a hard wire cable only and the screen needs to be installed by an authorized installer.

Plug n' Play
The product is available with Plug n' Play function; quick and easy installation where no authorized electrician is needed.

1:1 Square
Height > width. Extra height gives additioanl flexibility, often suitable for educational applications. No black borders.

1:1 Square
The projection width and height is in the aspect ratio of 1:1. No black borders.
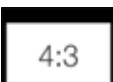

4:3 Video
The projection width and height is in the aspect ratio of 4:3. A part number followed by "-V" indicates the screen has black borders.
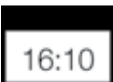

16:10 Data
The projection width and height is in the aspect ratio of 16:10. Often suitable for business projectors. A part number followed by "-D" indicates the screen has black borders.
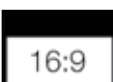

16:9 Wide
The projection width and height is in the aspect ratio of 16:9, a commonly used format in movies. A part number followed by "-W" indicates the screen has black borders.

2.35:1 Cinemascope
The projection width and height is in the aspect ratio of 2.35:1. Often suitable for home cinema applications. A part number followed by "-C" indicates the screen has black borders.

SESAME 2.1 electric

The Sesame 2.1 is the Euroscreen's award winning model with an innovative recessed ceiling case design for installation within a ceiling void, suitable for installation in suspended or plastered ceilings. Once more it has been upgraded to complete the innovative screen design with adjustable inner brackets which allow for fine-tune of bottom dowel for perfectly flush closure when retracted up into case. The white aluminium case itself has a stylish appearance and unique removable integrated external flange profiles for easy and quick service access. The case also features a concealed drop function of the complete screen section which enable for easy access to install case first and screen later. Brackets especially designed for Sesame 2.1 provides a trouble-free installation of the case in a prepared ceiling cut-out up to a 100 cm ceiling void (see page 11).

» Case size (W x H): 161 x 100 mm
» Case length: screen width + 345 mm
» Cut-out case size (W x H): 140 x 102 mm
» Cut-out length: screen width + 325 mm

Sesame 2.1 Tab Tension

The tensioning function provides Sesame 2.1 with a flat viewing surface, and the surface flatness can be adjusted after time if needed. This feature, together with the concealing design of the model, makes it very popular in conference rooms where high technology Short Throw projectors are common and among home theatre enthusiasts where full HD projectors are used.

» Case size (W x H): 161 x 100 mm
» Case length: screen width + 525 mm
» Cut-out case size (W x H): 140 x 102 mm
» Cut-out length: screen width + 505 mm
» 4:3, 16:10 and 16:9 with black borders all have 30 cm black drop as standard

Unique removable external flange profiles and perfectly flush closure of dowel.

LINEA Tab Tension

The Linea Tab Tension cassette has a unique designed shape which consists of gently rounded aluminium, with no exposed mounting fixtures or fasteners, and all attachment points are completely invisible.

Delivered with Euroscreen® Control Box (part no. 210730) with Plug n' Play feature - fast and easy installation! Choose optional transmitters; AutoLink RF, RF remote control, IR remote control or RF Wall Switch Transmitter.

The case is finished in white and the white heavy weight bottom dowel retracts completely inside the case when the screen is not in use. Thanks to the tensioning wires, which are integrated along the screen surfaces vertical edges, a fully flat screen surface can be obtained for many years in use. A perfectly flat screen surface is a requirement when using Short Throw projectors where the wide angled projector lens put higher demands on the quality of the projection screen.

- » Uniquely designed, gently rounded aluminium cassette
- » Perfectly flat screen surface
- » Easy to adjust surface flatness when required
- » Bottom dowel retracts completely into case
- » Heavy weight bottom dowel in white finish
- » Delivered with Euroscreen® Control Box as standard
- » Case size (W x H): 121 x 153 mm
- » Case length: screen width + 409 mm
- » 4:3, 16:10, 16:9 and 2.35:1 with black borders all have 30 cm black drop as standard

NEW! Available with the new FlexPerf screen surface - a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. See page 7 for more info.

Elegant case design with no exposed fastners and flat surface with Tab Tension.

DIPLOMAT electric

The Diplomat is Euroscreen's best-selling projection screen with its white aluminium cassette and channel-fixed installation. The channel-fixed feature makes it one of the market's most flexible and easy screens to install. Thanks to its functional and comprehensive design the Diplomat is suitable for any application; especially popular in conference and education facilities, and home theatres.

»   White cylindrical shaped aluminium cassette
»   Channel-fixed and flexible installation
»   Case size (W x H): 101 x 105 mm
»   Case length: screen width +125 mm
»   Bottom dowel from wall: 48 mm

Diplomat Tab Tension

The tensioning function provides Diplomat with a flat viewing surface, and the surface flatness can be adjusted after time if needed. A new heavy weight bottom dowel in white finish provides extra vertical tensioning. The model is very popular in conference rooms where high technology Short Throw projectors are common and among home theatre enthusiasts where full HD projectors are used.

»   Heavy weight bottom dowel in white finish
»   Case size (W x H): 101 x 105 mm
»   Case length: screen width + 285 mm
»   4:3, 16:10 and 16:9 with black borders all have
    30 cm black drop as standard

NEW! Available with the new FlexPerf screen surface - a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. See page 7 for more info.

Audio Visual Equipment

BLACKLINE electric

The Euroscreen® BlackLine electric offers a stylish projection screen with a black aluminium cassette, especially appreciated in home theatre environments. The black case together with the black framework of the screen surface works very well together and puts the focus on the projected image. The BlackLine is easy to install with its channel-fixed mounting feature, and it is suitable for both wall and ceiling installation.

- » Black cylindrical shaped aluminium cassette
- » Channel-fixed and flexible installation
- » Case size (W x H): 101 x 105 mm
- » Case length: screen width +125 mm
- » Bottom dowel from wall: 48 mm

BlackLine Tab Tension

The tensioning system and the new extra heavy weight bottom dowel in black finish provides BlackLine with a perfect flat viewing surface. The surface flatness can easily be adjusted after time if needed. A perfect flat viewing surface is a must when high technology Short Throw projectors are used and also highly recommended for Full HD projectors.

- » Heavy weight bottom dowel in black finish
- » Case size (W x H): 101 x 105 mm
- » Case length: screen width + 285 mm
- » 4:3, 16:9 and 2.35:1 with black borders
  all have 30 cm black drop as standard

NEW! Available with the new FlexPerf screen surface - a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface.

Black case with channel-fixed installation and and also available as Tab Tension.

CONNECT electric

The Connect electric projection screen is the longest established model within the Euroscreen® range. Its cassette has a square design with soft edges, and the white steel case is equipped with matching end caps which can be used for an easy mounting directly onto the wall or the ceiling.

- » White square shaped steel case
- » Matching white end caps for easy mounting directly onto wall or ceiling
- » Case size (W x H): 74 x 74 mm
- » Case length: screen width + 91 mm
- » Bottom dowel very close wall
- » Optional wall brackets allow keystone correction

Connect Electric with matching end caps for easy mounting and Plug n' Play feature for a quick installation.

WALL or CEILING

DIPLOMAT XL FLEX electric
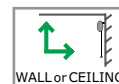

Euroscreen® Diplomat XL Flex is a new electric projection screen, a perfect solution for large venue installations, and is available in sizes up to 600 cm in width. The Diplomat XL Flex has a cylindrical shaped case in white aluminium and is delivered with extra sturdy brackets for a safe installation. The viewing surface is a flexible white front projection material with a gain of 1.0. The surface is welded either horizontally or vertically to match desired formats and sizes, leaving an almost invisible weld. To gain the flattest viewing surface possible Diplomat XL Flex is equipped with a heavy weight bottom dowel.

» Available in sizes up to 600 cm in width
» Cylindrical shaped case in white aluminium
» Extra sturdy brackets
» Flexible white front projection surface, gain 1.0
» Surface welded either horizontally or vertically
» Almost invisible weld
» Heavy weight bottom dowel in white finish
» Delivered with 3 m hard wire cable
» Case size (W x H): 165 x 170 mm
» Case length: screen width + 151 mm
» Bottom dowel from wall: 30 mm
» Recommended control options: Control Box, AutoLink RF or RF remote control

ACCESS FLEX electric
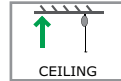

For concealed, large venue installations Euroscreen® offers the new Access Flex case for completely new possibilities for recessed ceiling. Not only is the screen entirely hidden when not in use, but Access Flex offers the possibility to install the case first and the screen any time later, therefore the screen surface is not at risk of damage during construction work. Access Flex is available in sizes up to 450 cm in width and has a flexible white front projection surface. The surface is welded either horizontally or vertically to match desired formats and sizes, leaving an almost invisible weld.

» Case for recessed ceiling installations
» Available in sizes up to 450 cm width
» Possibility to install the case first and screen later
» Flexible white front projection surface, gain 1.0
» Surface welded either horizontally or vertically
» Almost invisible weld
» Sliding brackets inside the case accommodate different sizes of screen in the same case
» Sliding brackets on top of case allow unlimited adjustment for mounting
» Bottom of case is removable without tools for screen installation or maintenance
» Delivered with 3 m hard wire cable
» Case size (W x H): 205 x 180 mm
» Recommended control options: Control Box, AutoLink RF or RF remote control

The recessed ceiling Access case open for service (1) and case closed (2).

DIPLOMAT XL electric
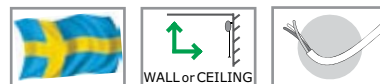

Diplomat XL is an electric projection screen available in sizes up to 450 cm width and in several projection formats. The model has a white cylindrical shaped aluminium case, equipped with sturdy brackets for a rigid installation. The screen surface used for Diplomat XL is Euroscreen® Arctiq; textile backed matt white with a black backing. Surface areas are seamed together with a fine lined seam to match desired screen size. The recently upgraded bottom dowel has extra weight to obtain the flattest viewing surface possible.

Diplomat XL is also available with the optional choice of the Access case for recessed installation, which is an excellent choice as it is possible to conceal the projection screen within a ceiling void. Easily install the Access case first, and the screen any time later. See page 35 for more information about Access case.

- » Available in sizes up to 450 cm
- » White cylindrical shaped aluminium case
- » Heavy weight bottom dowel in white finish
- » Matt white textile backed screen surface
- » Delivered with 3 m hard wire cable
- » Case size (W x H): 165 x 170 mm
- » Case length: screen width +121 mm
- » Bottom dowel from wall: 30 mm
- » Recommended control options: Control Box, AutoLink RF or RF remote control

Available in sizes up to 450 cm in width.

ROYAL electric

The Royal electric by Euroscreen® is an alternative for large venue installations where the screen surface is required to be in one piece. The Euroscreen® AstraNova screen surface has white front projection surface and black backing. The Royal is available in sizes up to 600 cm in width. A cylindrical shaped aluminium cassette in white finish characterizes the Royal projection screens up to 4.5 meters wide, while larger sizes are delivered with a square shaped wooden case finished in white. Sturdy brackets for wall or ceiling installation are included as standard. The recently upgraded bottom dowel has extra weight to obtain the flattest viewing surface possible.

Royal is also available with the optional choice of the Access case for recessed installation, which is an excellent choice as it is possible to conceal the projection screen within a ceiling void. Easily install the Access case first, and the screen any time later. See page 35 for more information about Access case.

» Available in sizes up to 600 cm width
» Large sized electric screen with one piece screen surface
» Heavy weight bottom dowel in white finish
» White aluminium case for width up to 450 cm
» White wooden case for sizes over 450 cm (*)
» Delivered with 3 m hard wire cable
» Case size (W x H): 165 x 170 mm (≤ 450 cm)
» Case size (W x H): 220 x 220 mm (> 500 cm)
» Recommended control options: Control Box, AutoLink RF or RF remote control

White aluminium case up to 450 cm width (1) and white wooden case in sizes above 450 cm (2).

LODO electric
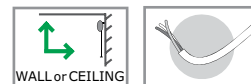

For the absolute largest electric screen option the LODO is offered, available in sizes up to 700 cm width. LODO is a large sized professional electric screen with a strong square shaped aluminium cassette in matt white finish. The screen is supplied with safety chains which provide an upper-grade of safety. The screen surface is a white flexible surface with a gain of 1.1 for front projection.

- » Available in sizes up to 700 cm width
- » Square shaped white aluminium case
- » Supplied with extra safety chains
- » Case size (W x H): 210 x 204 mm
- » White flexible screen surface

ACCESS installation case
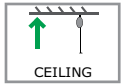

CEILING

The Access recessed installation case is an excellent choice when it is possible to conceal the projection screen within a ceiling void. The screen is completely concealed above the ceiling when not used. Also provides the benefit of installing the case first and the screen any time later, therefore any risk of damage the screen surface is minimized. The aluminium case features ceiling trim flanges and movable brackets for an easy installation.

Access installation case is an optional choice to the following standard projection screens models:
Linea Tab Tension - read more on page 14
Access Flex - read more on page 31
Diplomat XL - read more on page 32
Royal - read more on page 33

» Concealing recessed installation case
» Aluminium case with ceiling trim flanges
» Possible to install case first and screen later
» Sliding brackets inside the case accommodate different sizes of screen in the same case
» Sliding brackets on top of case allow unlimited adjustement for mounting
» Bottom is removable without tools for screen installation or maintenance
» Case size (W x H): 230 x 178 mm (includes flange and mounting brackets)

The Access case open for service (1) and case closed (2). Sliding brackets on top of case allow unlimited adjustment for mounting (3).

CONTROL BOX & other Control Options

NEW!

The Control Box is a new multifunctional unit for easy and trouble-free operation of electrical projection screens. The device features the most usual versions of operations such as RF, IR, Dry Contact/Contact Closure, 12V trigger and RS232. Euroscreen® offers optional transmitters for communication with the box; RF AutoLink trigger, RF or IR remote control, and RF wall switch transmitter. The Control Box is equipped with a 300cm cord to power outlet, a 150cm screen cord, and a 30cm Dry Contact/RS232 cable is included as standard.

» 1 single box provides no less than 5 possible control options
» Compatible with RF, IR, Dry Contact/Contact Closure, 12V trigger and RS232
» Built-in IR eye
» Dry Contact/RS232 cable (30cm) included
» 300cm power cord
» 150cm screen cord
» The Control Box is also available in complete kits

Automatic RF AutoLink

The Euroscreen® Control Box is beneficially supplemented with the RF AutoLink trigger. These two units create Euroscreen's uniquely developed control device AutoLink – now also RF operated. The automatic AutoLink is a clever control solution for a trouble-free projection screen operation. It does the job for you - just turn the projector on and the AutoLink triggers the screen to roll down, and when the projector is turned off the screen automatically retracts.

Transmitters

Several transmitter options available such as the hand remote controls, RF or IR, which have three buttons for up – stop – down. The IR remote control needs a clear path from the projection screen's IR receiver and the IR transmitter on the remote control. The RF remote control on the other hand can be used from a long distance, up to 30 m, and disregards obstacles since the RF does not need a visible connection between transmitter and receiver. Same function on the new RF wall switch transmitter.

Switches

The most basic control option is the InLine switch with the up – stop – down positions. The switch is integrated with the cable, whose total length is 300 cm. Ready to use when screen is delivered. The external wall switch has up – stop positions and must be installed by electrician. The key switch is an external switch controlled with a removable key. Up – stop – down positions. Must be installed by electrician.

SCREEN ACCESSORIES Manual Screens

Wall Brackets
Euroscreen® wall brackets in white finish are available in four lengths; 15 cm, 30 cm, 50 cm and 75 cm.
The brackets are easily adjusted and delivered as pair.

Magnets
The magnet strip is permanently attached on the back of the bottom bar to attach to a white board for
example. The removable super magnet hook is mobile and has the same functionality as the magnet strip.

Draw Sticks
Draw sticks for manual projection screens in two lengths; 100 cm and 140 cm.

Pulling Cord
Black pulling cord for manual projection screens, 75 cm. Often a suitable complement to super magnet
hook and draw sticks.

Wall brackets: 75, 50, 30 and 15 cm.

Drawstick, 2 lengths.

DIPLOMAT manual

The Diplomat is Euroscreen's best-selling projection screen with its white aluminium cassette and channel-fixed installation. This makes it one of the market's most flexible and easy screens to install. Thanks to its functional and comprehensive design the Diplomat is suitable for any environment; conference rooms, education facilities and home theatres.

» White cylindrical shaped aluminium cassette
» Channel-fixed and flexible installation
» Case size (W x H): 89 x 105 mm
» Case length: screen width + 86 mm (≤ 200 cm width)
» Case length: screen width + 94 mm (> 200 cm width)
» Bottom dowel from wall: 48 mm

Soft&Quiet

Get the best functionality out of the manual projection screen and at the same time preserve the mechanism and function for years and years by upgrading to the Soft&Quiet feature. The Soft&Quiet feature is a reliable and strong roller mechanism that slowly and smoothly retracts the screen surface into the case, slowing even more as it approaches its upper limit. Just a simple tug on the handle or the pull cord is all that is needed. The Soft&Quiet feature prolongs the life of a manual screen since it prevents potential damage to the case and its mechanism, and screen surface.

» Reliable and strong roller mechanism
» Slowly retracts the screen surface into the case
» Slowing as it approaches its upper limit
» Prolongs the life of the screen

Channel-fixed installation for maximum flexibility.

BLACKLINE manual

The Euroscreen® BlackLine model offers a stylish projection screen in a black aluminium cassette, especially appreciated in home theatre environments. The black case together with the black framework of the screen surface works very well together and puts the focus on the projected image. The BlackLine cassette is easy to install with its channel-fixed mounting feature, and it is suitable for both wall and ceiling installation.

» Popular manual screen for home theatre applications
» Black cylindrical shaped aluminium case
» Channel-fixed and flexible installation
» Case size (W x H): 89 x 105 mm
» Case length: screen width + 86 mm (≤ 200 cm width)
» Case length: screen width + 94 mm (> 200 cm width)
» Bottom dowel from wall: 48 mm

Soft&Quiet
Get the best functionality out of the manual projection screen and at the same time preserve the mechanism and function for years and years by upgrading to the Soft&Quiet feature. The Soft&Quiet feature is a reliable and strong roller mechanism that slowly and smoothly retracts the screen surface into the case, slowing even more as it approaches its upper limit. Just a simple tug on the handle or the pull cord is all that is needed. The Soft&Quiet feature prolongs the life of a manual screen since it prevents potential damage to the case and its mechanism, and screen surface.

» Reliable and strong roller mechanism
» Slowly retracts the screen surface into the case
» Slowing as it approaches its upper limit
» Prolongs the life of the screen

Black case with channel-fixed installation.

CONNECT manual
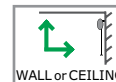

The Connect projection screen is the longest established model within the Euroscreen® range. Its cassette has a square design with soft edges, and the white steel case is equipped with matching end caps which are used for an easy installation directly onto the wall or the ceiling. This economical screen is available in a large selection of projection formats. The Connect is often used for educational applications and is therefore recommended together with optional mounting brackets which allow keystone correction if required.

- » White square shaped steel case
- » Matching white end caps
- » Use end caps for easy installation directly onto wall or ceiling
- » Case size (W x H): 74 x 74 mm
- » Case length: screen width + 91 mm
- » Bottom dowel very close to wall
- » Optional wall brackets allow keystone correction

Use end caps for fast installation directly onto wall.

Audio Visual Equipment

EXCELLO 2000 manual

The Euroscreen® Excello 2000 is a rail system designed to use wall space most efficiently. Projection screen and other visual resources such as maps and posters are integrated with the rail system for a most mobile and flexible use. Compatible Euroscreen® projection screens are offered up to 240 cm width within the Excello 2000 system.

» Efficient rail system
» Easy to install
» Use of projection screens, maps and posters in a very flexible way

Map carriers and case carriers, sold as pair.

FRAME VISION LIGHT

Frame Vision Light is a permanently tensioned projection screen that achieves an optimal flat viewing surface. The Frame Vision Light has a clever construction that makes it easy to assemble the 5 cm wide frame profiles and attach the screen surface. Easy-mounted wall brackets to hang the complete screen onto are included. The frame design puts equal tension on each part of the viewing surface, making it perfectly smooth. The light-weight black aluminium border frames the projected image nicely. For a even more fantastic viewing experience, the Vel-Tex® option is highly recommended.

» 5 cm wide black aluminium frame
» Perfectly flat viewing surface
» Easy to assemble frame parts
» Screen surface attaches to the frame without snaps or tools
» Easily mounted wall brackets included

NEW! Available with the new FlexPerf screen surface - a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. See page 7 for more info.

Vel-Tex®
The Vel-Tex® option is a true black, velvety textile covering on all of the frame parts. Not only does the Vel-Tex® give the screen a more luxurious impression and conceals all trace of joints in the frame; it is also more forgiving to any incorrect adjustment of the projected image since every small edge of the images beyond the inner frames are visually absorbed by the Vel-Tex®. At the same time it helps to cut reflection from surroundings lights.

» Black, velvety textile covering
» Provides a luxurious impression
» Conceals all trace of joints in the frame
» Incorrect adjustment visually absorbed
» Cuts reflection from surroundings lights

Assemble the 5 cm wide aluminium frame profiles - Vel-Tex® is a recommended option!

NEW!

FRAME VISION

The Frame Vision is Euroscreen's largest permanently tensioned projection screen; available up to 420 cm width. The surface is stretched on the reverse of the 10 cm wide black aluminium frame which provides an attractive and powerful black framework to the projected image. The Vel-Tex® option is highly recommended to obtain an even greater viewing experience. The frame puts equal tension on each part of the viewing surface and the flexible screen surface can be adjusted into three different channels to ensure optimal flatness. The frame profiles are easily assembled and easy-mounted wall brackets are included for a trouble-free installation onto the wall.

NEW! Available with the new FlexPerf screen surface - a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. See page 7 for more info.

Vel-Tex®

The Vel-Tex® option is a true black, velvety textile covering on all of the frame parts. Not only does the Vel-Tex® give the screen a more luxurious impression and conceals all trace of joints in the frame; it is also more forgiving to any incorrect adjustment of the projected image since every small edge of the images beyond the inner frames are visually absorbed by the Vel-Tex®. At the same time it helps to cut reflection from surroundings lights.

- »   Black, velvety textile covering
- »   Provides a luxurious impression
- »   Conceals all trace of joints in the frame
- »   Incorrect adjustment visually absorbed
- »   Cuts reflection from surroundings lights

Frame Vision: 10cm wide aluminium frame.

NEW!

Sizes ≥ 300cm width includes additional frame stag/s.

FRAME VISION with Vel-Tex

Vel-Tex®

The Vel-Tex® option is a true black, velvety textile covering on all of the frame parts. Provides a luxurious impression and cuts reflection from surroundings lights. Incorrect adjustment is visually absorbed.

NEW!

Sizes ≥ 300cm width includes additional frame stag/s.

DIFFUSION SCREENS
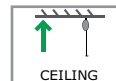

Diffusion screens are an excellent choice for rear projection installations and especially suitable for window displays or indoor usage in controlled lighting areas. With a rear projection solution, there is no need to have the actual valuable product on display but instead commercial movies and multimedia experiences can be displayed on the screen to attract the viewer. The diffusion screen is an acrylic rigid surface which provides an attractive mix of light output and contrast.

DIFFUSION CONTRAST

» Acrylic rigid surface for rear projection
» Attractive mix of light output and contrast
» Gain 2.2
» Delivered with standard frame, wire and brackets for mount
» Other screen sizes available upon request

DIFFUSION WHITE

» Acrylic rigid surface for rear projection
» Extremely high gain 8.0
» Viewing cone 120°
» Optimized for window display
» Delivered with standard frame, wire and brackets for mount
» Other screen sizes available upon request

Suitable for window displays or indoor usage.

CUSTOM PRINT

We print your name, logo or promotional message onto the screen surface! The details will be on view all the time the screen is in use and be at the focal point of the audience's attention. On the popular Euroscreen® Connect Floor screen, the area below the screen itself can be printed, ensuring that your brand or message is constantly on view during presentations. This is ideal for sales teams and promotion agencies.

» Maximum exposure of message and/or logo

» 4-colour print

» Layout included in print charge

» Preferred logo/artwork as .eps

	SEK	EUR	GBP
Printing charge for custom print, incl. layout	kr 1 006	€ 115	£ 91

1. After receiving logo/artwork from customer a suggested layout is created. The layout is sent back to customer for approval.

2. The approved layout is processed and ripped in the printer's high technology software.

3. The layout is printed on Euroscreen® Arctiq screen surface for an ideal colour rendition and contrast.

4. The artwork is accurately cut in the desired size and format.

5. The printed surface is being installed onto a roller and the screen is assembled.

6. Done! The screen is ready

to be at the focal point of the audience's attention.

CONNECT FLOOR

PORTABLE

Need a compact and reliable projection screen when out on the road? If yes, the portable Connect Floor is the answer! This screen is one of the best-selling Euroscreen® products and is a favourite with many customers. Compared to other portable screens the Connect Floor is sturdier, often more practical, and contains fewer parts than a tripod screen. The steel cassette rests steadily on the floor supported by a "foot" and provides an available viewing area from the cassette to the top of the raised viewing surface. The model is very easy to set up, light-weight and integrated handle makes it easy to carry along. Optional black padded carry case for extra protection is also available.

» Mobile projection screen suitable for presentations on the road
» Perfect screen model to display custom printed messages
» Light-weight steel case in white finish
» Easy to set up
» Very slim when not in use
» Case size (W x H): 110 x 130 mm
» Case length: screen width + 72 mm
» Padded protective carrying case available

The light-weight Connect Floor is easy to store away when not in use.

TRIPOD CONNECT

Tripod Connect is a portable projection screen ideally suited for a mobile and flexible use. The screen has a black cassette and a robust and detachable tripod stand which makes it perfect for mobile presentations and home theatre. The screen is light weight and easily set up in just a few moves. The Tripod Connect has a built-in keystone eliminator and is therefore a perfect match with use of overhead projectors.

- » Portable tripod projection screen
- » Light weight black steel case
- » Easy to set up
- » Detachable tripod
- » Screen height above floor: 40 - 80 cm
- » Padded protective carrying case available

AV CABINET

Store all valuable AV equipment safely in this high quality Euroscreen® AV Cabinet in stylish Scandinavian design. The AV cabinet has three shelves; the two bottom ones have adjustable heights. The cabinet is equipped with two solid lockable doors, both front and back for easy installation access. Other features are integrated cable management for ease of installation and a clean appearance, two sturdy cable-tidies to wrap cables around, and large ventilation grills to keep the inside cool.

- » Store all your AV equipment in one place
- » Designed for ease of use, blends in well in most modern environments
- » 3 shelves: the two bottom ones have adjustable heights
- » Top shelf slides out up to 26 cm
- » Two solid lockable doors front and back
- » Integrated cable management throughout cabinet for ease of installation
- » Two sturdy cable-tidies to wrap cables around
- » Ventilation grills assist airflow to cool equipment inside
- » Other finishes available upon request
- » Overall size (W x L x H): 55 x 60 x 91 cm
- » Optional 19" rack available

Optional 19" rack for a secure storage of all electrical equipment.

LECTERN TOP for AV Cabinet

Transform the AV cabinet in just a few seconds to a professional lectern with the clever solution of a Lectern Top. The light weight top is easy to place onto the cabinet and no mounting is required. For ease of installation the Lectern Top has an integrated cable management throughout the unit which provides the opportunity to place a computer either on the very top or out of sight in the void below.

As an extra professional detail and appreciated feature a "mini screen" can be ordered to complete the AV unit. The mini screen is a perfect choice for company logos or message exposure in 4-colour print, and at the same time hide ventilation grills and cable-tidies from the audience.

Lectern Top

- » Mobile lectern top for a flexible use of the AV Cabinet
- » Robust and stable top
- » No mounting is needed - just lift top on/off the AV Cabinet
- » Integrated cable management for ability to place laptop on top area
- » Fold down top board for support of notes or hiding of objects
- » Total size (W x H x D): 57 x 66 x 17 cm

Mini Screen

- » Perfect for logo or message exposure
- » Hides ventilation grills and cable-tidies
- » 4-colour print
- » Printing area (W x H): 51 x 80 cm

Fold down top board for support of notes or hiding of objects.

FAQ The fast way to an answer.

What price do I pay?
Prices in this price list are Recommended Retail Prices. The prices are excluding VAT and export packaging. All invoices are based on the current price list of Draper Europe AB in SEK, EUR or GBP currency. The prices are Ex Works, Draper Europe AB, Halmstad, Sweden, in accordance with Incoterms 2000.

How do I buy a Euroscreen® product?
Euroscreen® products are only sold to qualified dealers. Contact the Draper Europe AB sales office to find your closest dealer.

Are Euroscreen® products kept in stock?
Euroscreen® products are manufactured only by orders. The normal lead time is 1-2 weeks.

Are Euroscreen® products CE approved?
Yes.

What is Tab Tension?
Projection screens with Tab Tension have a tensioning function with a wire running from end of bottom dowel to the top of the screen. Tab Tension screens are manufactured with a stretchable surface, and the possibility to adjust the flatness of the surface provides a perfectly flat viewing surface for years and years. Tab Tension screens are popular for conference applications where high technology Short Throw projectors are common and among home theatre enthusiasts where Full HD projectors are used.

The difference between a white and a grey screen surface?
As a general rule a white screen surface is used when most of the surrounding lights can be blocked out. The white areas of the projected image are shown as truly white, and the colours are authentically reflected on the screen surface. However, in many cases it can be difficult to block out all surrounding light, and therefore a grey screen surface might be a better choice. A grey screen surface enhances the darker image areas even when light sources tend to make it lighter, and a better contrast between colours and black/white is perceived.

On which side is the cable attached on projection screens?
The motor and cable are as standard mounted on the left side of Euroscreen® projection screens, with the exception of the Sesame 2.1 model where the motor and cable are on the right side (from audience side).

How to maintenance and clean a projection screen?
To protect a screen when not in use, store it in the fully retracted position. Do not install the screen close to a heat source. To clean the screen surface carefully use only neutral cleaning as water and soap. Euroscreen® also provides a special Screen Cleaning Spray. Stains like paint or ink might be impossible to remove. Contact our sales office for advice.

What warranty does Draper Europe AB offer?
Euroscreen® products are covered by 2 year warranty from invoice date. The warranty is valid for any damage caused by wrong manufacturing. Any incorrect tampering with the screen limit will discontinue our warranty on the product. The warranty does not cover any damages for transport; please contact the company responsible for the transport.

Where to turn to with a complaint?
We recommend that the end user contact the dealer where the product was purchased. If needed, the dealer will then contact Draper Europe AB to receive further information. Draper Europe AB reserves the right to check a returned product before replacing it.

TERMS OF SALE

Ordering and delivery
Orders in writing, by fax or by e-mail are accepted and deliveries are made Ex Works, Draper Europe AB, Halmstad, Sweden, in accordance with Incoterms® 2010.

Price
All invoices are based on the current price list of Draper Europe AB in SEK, EUR or GBP currency. The prices are Ex Works, Draper Europe AB, Halmstad, Sweden, in accordance with Incoterms® 2010, and does not include export packaging. The prices are excluding VAT.

Payment
