## 01 NEW VALHALLA ADDITION: FREYA

It's a girl! Our newest addition to the Valhalla family is called Freya, from the Norse goddess famous for her passion for love, beauty and magic. Our Freya has a bit of it all! In today's modern design environments, more and more of our clients ask for discreet and stylish installations that don't clash with the rest of the room, and Freya is absolutely perfect for that. Being a recessed projection screen, it is almost completely invisible when not in use.

## 02 REACT 3.0

Coloured slightly darker than its predecessor, ReAct 3.0 is Full HD and 4K compatible, and the flexible fabric ensures an excellent, flat viewing surface for fixed frame and Tab Tension screens. With a gain of 1.0 and a viewing area of 76°, ReAct 3.0 offers universal benefits, and is an excellent choice for many AV installations.

## 03 TECHNICAL INFO

More detailed information and updated technical data sheets are always available on our website [www.euroscreens.se](http://www.euroscreens.se)

## 04 PORTABLE TRIPODS

Are you in search for tripod projection screens? Let us help you with that! Though not in our standard range, contact our sales office and find out what we can offer.

## 05 PROJECTOR LIFTS

We offer projector lifts to go with your projection screen. We have a selection of different types of models; scissor lifts, ceiling concealed, and mirror based. Contact our sales office for more detailed information.

# SCREEN *size*

*One of the most important decisions in projection screen selection is determining the size of screen based upon the dimensions of the audience area.*

## WIDTH

The general rule to be applied is that the screen should be of a width that is  $\frac{2}{3}$  the distance between the screen itself and the front row of the audience. To put it in another way, the closest people should be placed at a distance of what is 1.5 times the width of the screen. When in doubt, use the PISCR standard, which provides metrics for measurement and requirements for minimum contrast ratios for rear and front projection audiovisual projected image systems.

## VIEWING HEIGHT

The bottom of the screen should be approximately 100-120 cm above the floor in a room with a level floor and several rows of seats. In rooms with theatre seating or only one or two rows, such as a home theatre, the bottom of the screen should usually be 60-90 cm above the floor. Try to make sure that the lower part of the screen will be visible from all seats. Extra drop may be required to position the screen at a comfortable viewing level in a room with a high ceiling.

## HEIGHT

Screen height is generally determined by the width of the screen and the projection formats to be used. The height should not be exaggerated, but correctly estimated. Extra unused screen surface can cause issues with the screens mechanism and surface flatness, which will not fall under any manufacture faults clause.

## DOES IT REALLY MATTER?

Each Euroscreen® screen leaving our factory is crafted and mechanically optimized for the given settings during the time of the order. Therefore, we cannot stress enough how important it is to order the correct screen size and projection format from the beginning. This is even more crucial when it comes to Tab Tension models. To make sure we deliver the flattest screen surface possible, the screen limits are individually set on each roller screen and optimized for usage with full height stretched. With pre-set screen limits end-customers should not find it necessary to tamper mechanically with the limits. If screen limits are tampered with anyway this will not fall under any manufacture faults clause.

Not only does Euroscreen® offer a broad range of projection screens in standard sizes with high quality and clever designs. In addition, custom made projection screens are our signature. Choose custom height, width, screen surface, or even custom printed graphics for unparalleled options in selecting your projection screens.

# AUDIENCE AREA

The audience area can help you identify what type of projection screen is right for your unique installation. In determining the correct screen size in relation to the audience area, the goal is to make the screen large enough so those in the rear of the audience area can read the subject matter easily, but not so large that those in the front of the audience area have a problem seeing the full width of the projected image. Euroscreen® has a wide range of products and offers the following projection screen types:

- Roller projection screens, manual or electric where the latter is most popular, and Tab Tension, for installation either in the ceiling or the wall
- Fixed frame screens for a permanent installation on wall
- Portable projection screens for installations that will be transported, or built up and taken down frequently

## *Projection Format*

Once you have determined the correct size of screen for the audience area, that size may be modified based on the type(s) of projection equipment to be used. If the screen will only be used with one type of projector, it is easy to determine exact screen dimensions based on the projection format of that projector. Projection formats are expressed in terms of aspect ratio, which is the relationship of the width of the projected image to its height. Euroscreen® also offers several projection screen models in Nordic projection format, where the format is taller than it's wide.

## PROJECTOR PERFORMANCE

The projector's performance is also a highly significant factor to consider when determining what type of screen and screen surface should be used. For a Full HD or a Short Throw projector it is extremely important with a perfectly flat viewing area in order for it to perform as intended. Therefore these high technology projectors are used with a fixed frame screens with a permanently tensioned viewing surface, or Tab Tension screens where the adjustable tensioning system provides a flat surface.

# CUSTOM *GRAPHIC PRINT*

We print logos, backgrounds or promotional messages onto the screen surface. No matter if it's a manual, electric or portable projection screen, the details of the print will be at the focal point of the audience's attention. Both the Diplomat electric and manual screens, and the Connect Floor model, are suitable for graphic prints. Standard surface used is our matt white Arctiq. We also offer the environmentally friendly surface Xpert for graphic prints for Diplomat.

- MAXIMUM EXPOSURE OF MESSAGE AND OR LOGO
- ELECTRIC, MANUAL OR PORTABLE SCREEN
- XPERT SCREEN SURFACE AVAILABLE 4-COLOUR PRINT
- LAYOUT INCLUDED IN PRINT CHARGE
- PREFERRED FORMAT FOR LOGO/ARTWORK: EPS

# SCREEN SURFACES

*The projector makes the image, but it is the screen surface that shows it. We can not stress enough how important it is to have the correct screen surface in every unique application for you to get the best and most out of your money.*

Your selection of screen surfaces is essentially based on what type of projection screen you have concluded would be the best option for your application. Please note that in general, projection screen surfaces are sensitive to heat and are not suitable as black-out, or sun protection. Do not install the projection screen close to heat sources like radiators, amplifiers or turned on TV-sets.

Basically there are two types of screen surfaces: the unsupported vinyl which is characterised by its flexible qualities, and the textile backed with its reflective front surface laminated to a woven textile base.

The tensioned unsupported vinyl screen surfaces, whether for front or rear projection, need to be correctly tensioned to achieve sufficient flatness for optimal performance. These surfaces are used on fixed frame and Tab Tension screens, which provide the necessary support.

The non-tensioned textile backed screen surfaces are used on spring-roller operated and motorized projection screens. The screen hangs flat by virtue of the dimensional

stability of the material and the weight of the dowel in the bottom of the screen. As a general rule, a white screen surface is used when most of the surrounding lights can be blocked out. The white areas of the projected image are shown as truly white, and the colours are authentically reflected on the screen surface.

However, in many cases blocking out all surrounding light is a difficult (if not impossible) task, and therefore a grey screen surface might be a better choice. A grey screen surface enhances the darker image areas even when ambient light sources tend to make it brighter, and a better contrast between colours and black/white is perceived. Euroscreen® ReAct 3.0 is the superior high contrast surface and is an outstanding choice for projection in ambient or even brightly lit environments. ReAct 3.0 is a tensioned screen surface and available in fixed frame and Tab Tension screens. It is suitable for installations such as home theatres and business applications.

# OUR SURFACE MATERIALS

*All surface materials have different qualities and are suitable for different environments. Here's a little guide to what material is the best option for your installation.*

## NON-TENSIONED

**1. ARCTIQ** Euroscreen's standard matt white surface has got fibreglass support and is black-backed. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0. Requires control of ambient light in the audience area. Suitable for “wear & tear” installations, such as restaurants and pubs. Washable. Flame and mildew resistant.

**2. ASTRANOVA** A white, black-backed front projection surface. For use with some of Euroscreen's larger projection screens. Thickness 0.57 mm. Provides a flat viewing surface. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0.

**3. GREYLIGHT** Matt light grey front projection surface, fibreglass supported and black-backed. It diffuses projected light in all directions, so the image can be seen from any angle. Performs well in ambient light condition. Gain 0.75. Same base construction as Arctiq, with the same toughness against “wear & tear”. Washable. Flame and mildew resistant.

**4. XPERT** Euroscreen® Xpert surface is 100% PVC free, and is manufactured without using hazardous substances. While it is a more environmentally friendly viewing surface, Xpert does not sacrifice quality and effectiveness. Xpert provides excellent viewing flatness and colour rendition (colour temp. 6430 K). It is supplied with a white black-out backing for superior blocking of incoming light from behind. Gain 1.0. Flame retardancy B1.

GREENGUARD Children and Schools<sup>SM</sup> certified, meeting the strictest standards and contribute to healthier indoor air quality for school age children.

REACH controls the registration, evaluation, authorisation and limitation of chemicals. All Euroscreen® screen surfaces are approved by the REACH regulation.

European Chemicals Agency (ECHA) gathers information on chemical substances. All Euroscreen® projection screens are printed with colours approved by ECHA.

## TENSIONED

**5. REACT 3.0** Euroscreen® happily introduces the 3.0 version of ReAct. ReAct is a superior screen surface that presents an excellent viewing experience even with bright light in the audience area. The structure and finish of the silver grey material boost colour contrast and black levels in the projected image (colour temp. 6508 K). ReAct 3.0 ensures an excellent flat viewing surface. Full HD and 4K compliant. Gain 1.0.

**6. FLEXPREF** The FlexPerf surface is a vinyl reflective fabric with microscopic perforations which create a sound transparent projection surface. Home theatre enthusiasts find a new best friend in the FlexPerf surface since speakers can be placed behind the screen without any compromising the audio quality. The picture quality isn't compromised either, since FlexPerf's white front projection surface provides a complete viewing experience with full contrast and accurate colour rendition. Gain 0.8.

**7. FLEXREAR** Neutral grey rear projection diffusing surface allows placement of projector behind the screen. FlexRear provides high resolution and excellent contrast even in ambient light. Gain 2.5.

**8. FLEXWHITE** Pliable matt white surface which provides excellent flat viewing area and superb colour rendition (colour temp. 6565 K). Full HD compliant. It diffuses projected light in all directions, so the image can be seen from any angle. Gain 1.0. The black-backed FlexWhite M1 presents same high quality features, and in addition to its M1 fire resistant rating it also allows less light to pass through from behind the screen.

### *DO IT YOURSELF*

Euroscreen® gives you the opportunity to do-it-yourself, by getting the screen fabric only! The fabric is cut to desired size and delivered on a roll. See chart on page 7 for surfaces available as Do-It-Yourself.

# FAQ

---

## **WHERE CAN I BUY A EUROSCREEN® PRODUCT?**

Euroscreen® products are only sold by qualified AV dealers. Contact our sales office to find your closest dealer (see the last page of this catalogue for contact information).

## **ARE EUROSCREEN® PRODUCTS KEPT IN STOCK?**

Euroscreen® products are manufactured only by orders. The normal lead time is 1-2 weeks.

## **ARE EUROSCREEN® PRODUCTS CE APPROVED?**

Yes.

## **ARE THE SCREEN LIMITS SET IN THE FACTORY?**

Yes, please note that the projection screen is set at its outer limits when delivered. Incorrect adjustment of the screen limits may damage the product and eliminate the warranty. Make sure to always order correct screen size for each specific installation to avoid tampering with the screen limits afterwards and therefore jeopardise the functionality of the screen.

## **ON WHICH SIDE ARE THE MOTOR AND CABLE ATTACHED ON PROJECTION SCREENS?**

By default, the motor and cable are mounted on the left side of Euroscreen® projection screens. Sesame 2.1 is an exception, where motor and cable are mounted on the right side (facing the front of the screen).

## **I NEED A PROJECTOR LIFT – CAN YOU HELP?**

We have a selection of different types of projector lift models; scissor lifts, ceiling concealed and mirror based. Contact our sales office for more information.

## **WHAT IS A TAB TENSION SCREEN?**

A projection screen type that has connections on all sides of the screen material, which pull it taut in order to achieve a flat screen surface. Please note that the surfaces used in Tab Tension screens are sensitive to heat and are not suitable as black-out, or sun protection. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets.

## **WHAT IS GAIN?**

As it applies to projectors, gain is the measurement of a projection screen's light reflectance with unity gain being one. A high gain screen will reflect more light along a narrower path than lower gain screen. Screen gains under one use a grey screen to absorb ambient light to help maintain contrast ratios.

## **HOW DO I MAINTAIN AND CLEAN A PROJECTION SCREEN?**

To protect the screen when not in use, store it in fully retracted position. Do not install the screen close to heat sources like radiators, amplifiers or turned on TV-sets. To clean the screen surface, carefully use only neutral cleaning such as water and soap. Stains like paint or ink might be impossible to remove, but contact sales office should you need advice. Projection screens are generally not suitable as black-out or sun protection. Contact sales office for more information about window shades.

## **DO EUROSCREEN® PRODUCTS HAVE ANY WARRANTY?**

Euroscreen® products are covered by 2 year warranty from invoice date. The warranty is valid for any damage caused by wrong manufacturing. Please note that any incorrect tampering with the screen limit may discontinue the warranty of the product. The warranty does not cover any damages for transport; please contact the company responsible for the transportation.

## **WHERE SHOULD I TO TURN TO WITH ANY COMPLAINT?**

Any complaints are directed to the dealer where you made your purchase. We reserve the right to check a returned product before replacing it.

# ICONS

## MADE IN SWEDEN

Products with this symbol are designed and manufactured in Sweden.

## SMART MOTOR - ELECTRIC

Our newly developed Smart Motor has a quiet, built in feature to optimise your Euroscreen experience.

## SOFT&QUIET - MANUAL

A feature that retracts the surface slowly and smoothly into the case, slowing down even more as it approaches its upper limit. Prevents potential damages to the screen/screen surface through repeated impact with the case.

## PORTABLE

The screen is portable and no permanent installation is needed.

## INSTALLATION

The screen is supplied with a hard wire cable only and the screen needs to be installed by an authorized installer.

## PLUG N' PLAY

The product is available with Plug n' Play function; quick and easy installation where no authorized electrician is needed.

## WALL/CEILING INSTALLATION

The symbol indicates the installation required for the screen model.

The products are installed on the wall, on the ceiling or on either wall or ceiling.

## 1:1 SQUARE

Height > width. Extra height gives additional flexibility, often suitable for educational applications. No black borders.

## 1:1 SQUARE

The projection width and height is in the aspect ratio of 1:1. No black borders.

## 4:3 VIDEO

The projection width and height is in the aspect ratio of 4:3. A part number followed by "-V" indicates the screen has black borders.

## 16:10 DATA

The projection width and height is in the aspect ratio of 16:10. Often suitable for business projectors. A part number followed by "-D" indicates the screen has black borders.

## 16:9 WIDE

The projection width and height is in the aspect ratio of 16:9, a commonly used format in movies. A part number followed by "-W" indicates the screen has black borders.

## 2.35:1 CINEMASCOPE

The projection width and height is in the aspect ratio of 2.35:1. Often suitable for home cinema applications. A part number followed by "-C" indicates the screen has black borders.

# VALHALLA

*Inspired by the powerful Norse gods who had their home based at Valhalla, the Euroscreen® Valhalla is an exciting projection screen development project.*

#### **ADJUSTABLE INNER BRACKETS**

*With help of the inner brackets you can easily adjust the tube to make sure it is perfectly levelled.*

#### **TAB TENSION AVAILABLE**

*The tensioned version is offered with or without black borders. The black border is neatly welded onto the screen surface to create a powerful framework.*

#### **HIDDEN INSTALLATION**

*The recessed design of Freya makes it ideal when you want a discreet and stylish installation, with minimal intrusion of the surroundings.*

# FREYA

Freya is our newest addition to the Valhalla family, and is the perfect choice for hidden installations in large venues. The Freya projection screen is a recessed ceiling case and is available in a large range of standard sizes and screen surfaces, even as Tab Tension versions. Freya is made of aluminum and is developed and produced in Sweden.

As a key feature the screen is entirely hidden when not in use, with both screen and bottom dowel retracted in the recessed case. Moreover, Freya offers you the possibility to install the case first and the screen any time later,

therefore the screen surface is not at risk of damage during construction work. Sliding brackets on top of the case allow easy and unlimited adjustment when installing.

## FREYA TAB TENSION

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

---

### DETAILS: FREYA ELECTRIC

- Projection screen for recessed ceiling installations
- Possibility to install the case first and screen later
- Sliding brackets on top of the case allow unlimited adjustment during installation
- Adjustable inner brackets
- Bottom of case is removable without tools for screen installation or maintenance
- Delivered with 3 m hard wire cable
- Case size (W x H): 203 x 178 mm
- Case length: screen width + 280 mm
- Cut-out case size (W x H): 170 x 160 mm
- Cut-out length: screen width + 230 mm

### DETAILS: FREYA TAB TENSION

- Heavy weight bottom dowel
- Case size (W x H): 203 x 178 mm
- Total case length (incl. flanges): screen width + 450 mm
- Cut-out case size (W x H): 170 x 160 mm
- Cut-out length: screen width + 400 mm
- 4:3, 16:10, 16:9 and 2.35:1 with black borders – all have 25-30 cm black drop as standard

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

# THOR

The Thor motorised projection screen ranges from 250 cm and up in width and comes equipped with several popular features: an adjustable inner bracket for easy levelling of the screen\*, a sleek, stylish aluminium case, and can include an integrated multifunctional Euroscreen® Control Box

A convenient inner bracket makes it easy to level the screen, keeping the surface flat and the bottom dowel even. By default, wall brackets and flexible mounting brackets for ceiling installation are included. Optional recessed ceiling brackets are also available. The Thor case, finished in a contemporary white colour with

matching aluminium bottom dowel, has a convenient wall channel-fixed fitting that reduces expensive installation time. When black borders are required, a true black border with a matt finish is welded onto the screen surface. This creates a powerful framework for the projected image.

## THOR TAB TENSION

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

### DETAILS: THOR ELECTRIC

- Case size (W x H): 160 x 160 mm
- Case length: screen width +290 mm
- Bottom dowel from wall: 5-10 mm

### DETAILS: THOR TAB TENSION

- Case size (W x H): 160 x 160 mm
- Case length: screen width +440 mm
- Bottom dowel from wall: 5-10 mm 4:3, 16:10, 16:9 and 2.35:1 with black borders – all have 25-30 cm black drop as standard

# SESAME 2.1

The Sesame 2.1 is Euroscreen®'s award winning model with an innovative recessed ceiling case design for installation within a ceiling void. It is very suitable for installation in suspended or plastered ceilings.

It has been upgraded to complete the innovative screen design with adjustable inner brackets which allow for fine-tuning of the bottom dowel for perfect flush closure when retracted up into case. The white aluminium case itself has a stylish appearance, and unique removable integrated external flange profiles for easy and quick service access. The case also features a concealed drop function of the complete screen section, which

enables easy access and the possibility to install case first and screen later. Brackets especially designed for Sesame 2.1 provide a trouble-free installation of the case in a prepared ceiling cut-out up to a 100 cm ceiling void.

## SESAME 2.1 TAB TENSION

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

### DETAILS: SESAME 2.1 ELECTRIC

- Case size (W x H): 161 x 100 mm
- Case length: screen width + 345 mm
- Cut-out case size (W x H): 140 x 102 mm
- Cut-out length: screen width + 325 mm

### DETAILS: SESAME 2.1 TAB TENSION

- Case size (W x H): 161 x 100 mm
- Total case length (incl. flanges): screen width + 525 mm
- Cut-out case size (W x H): 140 x 102 mm
- Cut-out length: screen width + 505 mm
- 4:3, 16:10 and 16:9 with black borders – all have 25-30 cm black drop as standard

## RECESSED CEILING BRACKETS

Recessed ceiling brackets especially designed for Sesame 2.1 provide a trouble-free installation of the case in a prepared ceiling cut-out up to a 100 cm ceiling void.

- Adjustable height for extra flexibility
- Join two threaded rods to achieve increased length
- Delivered as pair

	Part No.	SEK	EUR
Recessed ceiling bracket, Sesame 2.1	930 200	kr 674	€ 79

Use one or two brackets depending on installation.

# LINEA

The Linea model has a uniquely designed case with a classic yet contemporary shape. The gently rounded aluminium case has no exposed mounting fixtures or fasteners, and all attachment points are completely invisible. The case is finished in white and the heavy weight bottom dowel retracts completely inside the case when the screen is not in use.

## LINEA TAB TENSION

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as blackout, or sun protection, contact sales office for more information about window shades.*

### DETAILS: LINEA ELECTRIC

- Uniquely designed, gently rounded aluminium cassette
- Bottom dowel retracts completely into case
- Heavy weight bottom dowel
- Delivered with Euroscreen® Control Box
- Case size (W x H): 121 x 153 mm
- Case length: screen width + 285 mm

### DETAILS: LINEA TAB TENSION

- Perfectly flat screen surface
- Easy to adjust surface flatness when required
- Heavy weight bottom dowel
- Case size (W x H): 121 x 153 mm
- Case length: screen width + 409 mm
- 4:3, 16:10, 16:9 and 2.35:1 with black borders – all have 25-30 cm black drop as standard

# DIPLOMAT

Diplomat is one of Euroscreen's best-selling projection screens with white contemporary aluminium cassette and channel-fixed installation. The channel-fixed feature makes it one of the market's most flexible and easy screens to install. Thanks to its functional design the Diplomat is suitable for any application; especially popular in conference and education facilities, as well as in home theatres.

## DIPLOMAT TAB TENSION

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

### DETAILS: DIPLOMAT ELECTRIC

- White cylindrical shaped aluminium cassette
- Channel-fixed and flexible installation
- Case size (W x H): 101 x 105 mm
- Case length: screen width +125 mm
- Bottom dowel from wall: 48 mm

### DETAILS: DIPLOMAT TAB TENSION

- Heavy weight bottom dowel
- Case size (W x H): 101 x 105 mm
- Case length: screen width + 285 mm
- 4:3, 16:10 and 16:9 with black borders – all have 25-30 cm black drop as standard

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

# DIPLOMAT XL

Diplomat XL is a large electric projection screen available in several projection formats. The model has a white cylindrically shaped aluminium case, equipped with sturdy brackets for a rigid installation. Surface areas are seamed together with a fine lined seam to match desired screen size. The bottom dowel has extra weight to obtain the flattest viewing surface possible.

## DETAILS: DIPLOMAT XL ELECTRIC

- White cylindrically shaped aluminium case
- Heavy weight bottom dowel for flat surface
- Delivered with 3 m hard wire cable
- Case size (W x H): 165 x 170 mm
- Case length: screen width +121 mm
- Bottom dowel from wall: 30 mm
- Recommended control options: Control Box, AutoLink RF or RF remote control

White aluminium case with sturdy brackets.

Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.

# ROYAL

Royal electric by Euroscreen® is an alternative for large venue installations. It is delivered with the Euroscreen® Astranova screen surface which has a white front projection surface and black backing. Royal is available in sizes up to 600 cm in width. A cylindrically shaped aluminium case in white finish characterizes the Royal projection screens up to 450 cm wide, while larger sizes are delivered with a square shaped wooden case finished in white. Sturdy brackets for wall or ceiling installation are included. The bottom dowel has extra weight to obtain the flattest viewing surface possible.

## DETAILS: ROYAL ELECTRIC

- Available in sizes up to 600 cm width
- Astranova surface (one piece fabric, no seams)
- Heavy weight bottom dowel
- White aluminium case for width up to 450 cm
- White wooden case for sizes over 450 cm (\*)
- Delivered with 3 m hard wire cable
- Case size (W x H): 165 x 170 mm (≤ 450 cm)
- Case size (W x H): 220 x 220 mm (> 500 cm)
- Recommended control options: Control Box, AutoLink RF or RF remote control

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

# DIPLOMAT

Diplomat is a popular projection screen with a white aluminium case and channel-fixed installation. This makes it one of the market's most flexible and easy screens to install. Thanks to its functional and contemporary design, Diplomat is suitable for any environment; conference rooms, education facilities and home theatres.

## SOFT&QUIET

Get the best functionality out of the manual projection screen and at the same time preserve the mechanism and function for years and years to come by upgrading to the Soft&Quiet feature.

The Soft&Quiet feature is a reliable and strong roller mechanism that slowly and smoothly retracts the screen surface into the case, slowing even more as it approaches the upper limit. Just a simple tug on the handle or the pull cord is all that is needed. The Soft&Quiet feature prolongs the life of a manual screen since it prevents potential damage to the case, its mechanism, and screen surface.

---

## DETAILS: DIPLOMAT MANUAL

- White cylindrically shaped aluminium cassette
- Channel-fixed and flexible installation
- Case size (W x H): 89 x 105 mm
- Case length: screen width + 86 mm ( $\leq$  200 cm width)
- Case length: screen width + 94 mm ( $>$  200 cm width)
- Bottom dowel from wall: 48 mm

## DETAILS: DIPLOMAT SOFT&QUIET

- Reliable and strong roller mechanism
- Slowly retracts the screen surface into the case
- Slowing down as it approaches the upper limit
- Prolongs the life of the screen

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

# CONNECT

The Connect projection screen is the longest established model within the Euroscreen® range. The case has a square design with soft edges, and the white steel case is equipped with matching end caps which are used for an easy installation directly onto the wall or the ceiling. This affordable screen is available in a large selection of projection formats. The Connect is often used for educational applications and is therefore recommended together with optional mounting brackets, which allow keystone correction if required.

**DETAILS: CONNECT MANUAL**

- White square shaped steel case
- Matching white end caps
- Use end caps for easy installation directly onto wall or ceiling
- Case size (W x H): 74 x 74 mm
- Case length: screen width + 91 mm
- Bottom dowel very close to wall
- Optional wall brackets allow keystone correction

Use end caps for fast installation directly onto wall.

Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.

# EXCELLO 2000

Euroscreen® Excello 2000 is a rail system designed to use wall space most efficiently. The projection screen and other visual resources such as maps and posters are integrated with the rail system for the most mobile and flexible use. Compatible Euroscreen® projection screens are offered up to 240 cm width within the Excello 2000 system.

## DETAILS: EXCELLO 2000 MANUAL

- Efficient rail system
- Easy to install
- Use of projection screens, maps and posters in a very flexible way

*Please note! The screen is sensitive to heat. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets. The projection screen is not suitable as black-out, or sun protection, contact sales office for more information about window shades.*

Map carriers and case carriers, sold as pair.

PORTABLE PROJECTION SCREENS

# CONNECT FLOOR

The portable Connect Floor is one of our best-selling products, and is a favourite with many customers. Compared to other portable screens the Connect Floor is sturdier, often more practical, and contains fewer parts than a tripod screen.

The steel case rests steadily on the floor supported by a “foot” and provides an available viewing area from the case to the top of the raised viewing surface. The model is very easy to set up, and the light weight and the integrated handle makes it easy to carry along. Connect Floor is also perfect for displaying custom printed messages to a large audience.

**DETAILS: CONNECT FLOOR**

- Mobile projection screen suitable for presentations on the road
- Perfect screen model for displaying custom printed messages
- Light-weight steel case in white finish
- Easy to set up
- Very slim when not in use
- Case size (W x H): 110 x 130 mm
- Case length: screen width + 72 mm
- Padded protective carrying case available

# FRAME VISION LIGHT

Frame Vision Light is a permanently tensioned projection screen that achieves an optimal flat viewing surface. The Frame Vision Light has a clever construction that makes it easy to assemble the 5 cm wide frame profiles and attach the screen surface.

Easy-mounted wall brackets to hang the complete screen onto are included. The frame design puts equal tension on each part of the viewing surface, making it perfectly smooth. The light-weight black aluminium border frames the projected image nicely. For an even more fantastic viewing experience, the Vel-Tex® option is highly recommended.

## VEL-TEX®

The Vel-Tex® option is a true black, velvety textile covering on all of the frame parts. Not only does the Vel-Tex® give the screen a more luxurious impression and conceals all trace of joints in the frame. It is also more forgiving to any incorrect adjustment of the projected image since every small edge of the images beyond the inner frames are visually absorbed by the Vel-Tex®. At the same time it helps reducing reflection from surroundings lights.

## DETAILS: FRAME VISION LIGHT

- 5 cm wide black aluminium frame
- Perfectly flat viewing surface
- Easy to assemble frame parts
- Screen surface attaches to the frame without snaps or tools
- Easily mounted wall brackets included

## DETAILS: VEL-TEX®

- Black, velvety textile covering
- Provides a luxurious impression
- Conceals all trace of joints in the frame
- Incorrect adjustment visually absorbed
- Reduces reflection from surroundings lights

# FRAME VISION

Frame Vision is Euroscreen®'s largest permanently tensioned projection screen, available up to 420 cm width. The surface is stretched on the back of the 10 cm wide black aluminium frame, which provides an attractive and powerful black framework to the projected image.

The Vel-Tex® option is highly recommended to obtain an even greater viewing experience. The frame puts equal tension on each part of the viewing surface and the flexible screen surface can be adjusted into three different channels to ensure optimal flatness. The frame profiles are easily assembled and easy-mounted wall brackets are included for a trouble-free installation onto the wall.

## VEL-TEX®

The Vel-Tex® option is a true black, velvety textile covering on all of the frame parts. Not only does the Vel-Tex® give the screen a more luxurious impression and conceals all trace of joints in the frame. It is also more forgiving to any incorrect adjustment of the projected image since every small edge of the images beyond the inner frames are visually absorbed by the Vel-Tex®. At the same time it helps reducing reflection from surroundings lights.

### DETAILS: FRAME VISION

- 10 cm wide black aluminium frame
- Perfectly flat viewing surface
- Easy to assemble frame parts
- Screen surface attaches to the frame without snaps or tools
- Easily mounted wall brackets included

### DETAILS: VEL-TEX®

- Black, velvety textile covering
- Provides a luxurious impression
- Conceals all trace of joints in the frame
- Incorrect adjustment visually absorbed
- Reduces reflection from surroundings lights

# CONTROL BOX

## AND OTHER CONTROL OPTIONS

The Control Box is a multifunctional unit for easy and trouble free operation of electrical projection screens. The device features the most usual versions of operations such as RF, IR, Dry Contact/Contact Closure, 12V trigger and RS232. Euroscreen® offers optional transmitters for communication with the box; RF AutoLink trigger, RF or IR remote control, and RF wall switch transmitter. The Control Box is equipped with a 300 cm cord to power outlet, a 150 cm screen cord, and a 30 cm Dry Contact/RS232 cable is included.

# SMART MOTOR

As an alternative to our installation motor, we have also developed a new, quiet, smart motor, with built in radio receiver and Dry Contact function. This means that the motor can be controlled directly from most control systems, and/or with our remote controls/wall transmitters via radio. The new smart motor operates comfortably quietly, just like our previous Quiet Motor, thanks to its innovative design.

# SCREEN ACCESSORIES

## MANUAL

### WALL BRACKETS

Euroscreen® wall brackets in white finish are available in four lengths; 15 cm, 30 cm, 50 cm and 75 cm. The brackets are easily adjusted and delivered as pair.

### MAGNETS

The magnet strip is permanently attached on the back of the bottom bar to attach to a white board for example.

### DRAW STICK

Draw sticks for manual projection screens in two lengths; 100 cm and 140 cm.

### PULLING CORD

Black pulling cord for manual projection screens, 75 cm. Often a suitable complement to draw sticks.

Wall brackets: 75, 50, 30 and 15 cm

Draw stick, 2 lengths.

# AV CABINET

Store all valuable AV equipment safely in this high quality Euroscreen® AV Cabinet in stylish Scandinavian design. The AV cabinet has three shelves; the two bottom ones have adjustable heights. The cabinet is equipped with two solid lockable doors, both front and back for easy installation access. Other features are integrated cable management for easy installation and a clean appearance, two sturdy cable-tidies to wrap cables around, and large ventilation grills to keep the inside of the cabinet cool. We have recently upgraded the AV Cabinet with new sets of wheels, to make it even sturdier and more easy to manoeuvre.

## DETAILS: AV CABINET

- Store all your AV equipment in one place
- Designed with usability in mind, blends in well in most modern environments
- 3 shelves: the two bottom ones have adjustable heights
- Top shelf slides out up to 26 cm
- Two solid lockable doors front and back
- Integrated cable management throughout cabinet for easy installation
- Two sturdy cable-tidies to wrap cables around
- Ventilation grills assist airflow to cool equipment inside
- Other finishes available upon request
- Overall size (W x L x H): 55 x 60 x 91 cm
- Optional 19" rack available

	Wt (kg)	Part No.	SEK	EUR

New wheels!

Optional 19" rack for a secure storage of all electrical equipment.

# LECTERN TOP

Transform the AV cabinet in just a few seconds to a professional lectern with the clever solution of a Lectern Top. The light weight top is easy to place onto the cabinet and no mounting is required.

To ensure an easy installation, the Lectern Top has an integrated cable management throughout the unit which provides the opportunity to place a computer either on the very top or out of sight in the void below. As an extra professional detail and appreciated feature, a “mini screen” can be ordered to complete the AV unit. The mini screen is a perfect choice for company logos or message exposure in 4-colour print, and at the same time hide ventilation grills and cable-tidies from the audience.

## DETAILS: LECTERN TOP

- Mobile lectern top for a flexible use of the AV Cabinet
- Robust and stable top
- No mounting is needed - just lift top on/off the AV Cabinet
- Integrated cable management for ability to place laptop on top area
- Fold down top board for support of notes or hiding of objects
- Total size (W x H x D): 57 x 66 x 17 cm

## DETAILS: MINI SCREEN

- Perfect for logo or message exposure
- Hides ventilation grills and cable-tidies
- 4-colour print
- Printing area (W x H): 51 x 80 cm

Fold down top board for support of notes or hiding of objects.
