DHT-T110

DHT-T110

TV SPEAKER BASE

SIMPLY BETTER TV SOUND

DHT-T110 is an under TV Speaker Base that dramatically improves your TV watching experience. Simply connect the all-in-one system to your television and enjoy powerful, dynamic audio from your favourite TV shows, movies, games and music. As today's flat panel TVs get thinner and thinner, so does their sound quality. DHT-T110 has digital audio inputs and features a host of high performance components to deliver rich, enveloping sound. In addition there is Dolby Digital Decoding, 3 Listening Modes with virtual surround sound as

well as a Night Mode, which let you enjoy high fidelity sound late into the night without disturbing other family members. The aptX Bluetooth feature let you stream music from a smartphone in CD quality and for other devices there is an 3.5-millimeter auxiliary input too. The DHT-T110 fits perfectly under most TVs up to 50." Elegantly styled, easy to setup and simple to use, the DHT-T110 is a great alternative to a traditional soundbar.

High Performance Sound

As today's flat panel TVs get thinner and thinner, so does their sound quality, and the DHT-T110 features a host of high performance components to deliver rich, enveloping sound. The speaker features dual 2" x 5" oval shape drivers and dual 1/2" dome tweeters that produce a range of sound, with deep bass and clear high frequencies.

Connect Bluetooth and other Portable Media Devices

Use the Bluetooth wireless input to receive music or audio from a compatible Bluetooth device, such as a smartphone or computer (with Bluetooth A2DP capability). We've also included aptX which allows for high quality music playback through Bluetooth. Or, you can also use the 3.5-millimeter auxiliary input to connect a variety of portable media devices, such as iPods or other MP3 players that are not Bluetooth enabled.

Dolby Digital Decoding

Your favorite movies and music will come alive thanks to the built-in Dolby Digital decoding, and you can enjoy enveloping surround sound thanks to Denon's Virtual Surround processing, which uses advanced psychoacoustic algorithms that simulate the surround sound of a multi-channel home theater speaker system.

3 Listening Modes & Night Mode

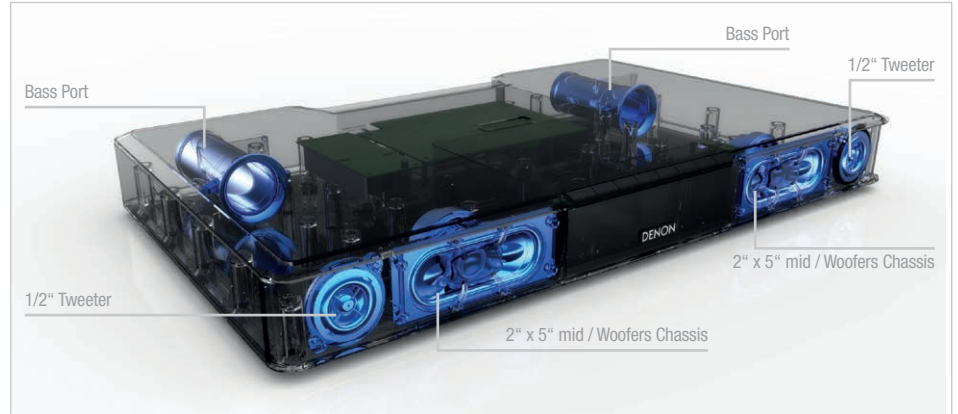

In addition to the Virtual Surround sound mode, the DHT-T110 features custom sound modes tailored for different content. Choose Movie or Music for enjoying your favourite movie soundtracks and music. The Dialog mode delivers clear high fidelity sound with no additional acoustic enhancements.

It also features Night Mode which lets you enjoy high fidelity sound without annoying jumps in volume, so you can watch your favorite programs late into the night without disturbing other family members.

Easy to Install, Easy to Setup, Easy to Use

Connect the DHT-T110 directly to your TV with the included optical cable. We've also included a coaxial digital audio cable, along with a stereo analogue audio cable. The auto input switching feature chooses the best available audio source automatically. Setup is supported by quick start guide and an owner's manual.

The DHT-T110 comes with its own remote control, and it also has the ability to work with your existing TV's remote control, by learning your TV's remote control IR commands, so you can control the soundbase and your TV with just one remote control.

NEW FEATURES
