

## Debut Carbon Phono USB (DC)

Audiophile turntable for Hifi & Audio-Transfer to PC/Mac

- 8,6" carbon tonearm with pre-mounted OM10 cartridge
- Increased platter size with more weight & felt mat
- Precision belt drive with synchronous motor
- New DC power supply with ultra precision frequency DC-driven AC generator (like Speed Box) for ultimate speed stability
- New TPE motor suspension
- Integrated Phono-MM preamplifier
- Connections: line-level RCA to amp & USB to PC/Mac (simultaneously)
- 7 high-gloss colours

|                      |                                       |
|----------------------|---------------------------------------|
| Speed                | 33, 45 (manual speed change)          |
| Drive principle      | belt drive                            |
| Platter              | 300mm metal with felt mat             |
| Mains bearing        | stainless steel                       |
| Wow & flutter        | +/- 0,10%                             |
| Speed drift          | +/- 0,80%                             |
| Signal to noise      | - 68dB                                |
| Tonearm              | 8,6", Carbon                          |
| Effective arm length | 218,5 mm                              |
| Effective arm mass   | 6,0 g                                 |
| Overhang             | 18,5mm                                |
| Tracking force       | 10 - 30mN                             |
| Included accessories | 15 volt DC power supply, lid          |
| Power connection     | 110/120 or 230/240 Volt - 50 or 60 Hz |
| Power consumption    | < 1 watt                              |
| Dimensions           | 415 x 118 x 320mm (WxHxD) lid closed  |
| Weight               | 6 kg net                              |

(DC) / OM10  
retail price  
**449,00 €**

### The best-buy turntable classic with carbon tonearm, computer connection and DC power supply!

The first Debut turntable, introduced in the late 1990s, was a revolution for the hi-fi industry. For the first time after the arrival of Compact Disc and the assumed demise of vinyl records, an analogue product re-emerged in the "mass market" – something all music lovers could afford. The new Debut Carbon Phono USB (DC) has been designed to set new standards in this category for the coming decade – perfectly timed as analogue today is again a respected source, while the demand for good turntables is growing again!

The most obvious improvement is the inclusion of a CARBON TUBE for the tonearm, which increases stiffness and decreases unwanted resonance. This material normally is extensively used in high-end tonearms, but – because of cost reasons – was never used in products at lower price levels. Together with other improvements like an increase in platter size and weight to realize even smoother rotation, the overall sound quality is greatly improved. The approved belt drive offers low noise AC motor with effective motor decoupling (utilising TPE damping) and ultra precision DC-driven AC frequency generator (like Speed Box) for ultimate speed stability without unwanted vibration.

Because Debut Carbon Phono USB (DC) comes with pre-mounted cartridge and built-in phono preamplifier with USB output, connection to both line-level input of your hifi system and recording of vinyl to PC/Mac easily can be done simultaneously!

Debut Carbon Phono USB (DC) is offered in high-gloss black or shiny red, green, blue, yellow, silver or white as no-added-cost option.
