1080p DVD Player

## RDV-1092

### 1080p DVD Player

Rotel is renowned for its digital source components, beginning with the legendary RCD-855 CD player back in 1989, the RCD-990 in 1996 and later with several highly praised DVD players including the recent RDV-1060. Now, Rotel have pulled out all the stops to give you a DVD player that sets a new standard in affordable, high-end, audio/video performance.

The RDV-1092 is a 1080P (Progressive Scan) DVD player with a built-in scaler and HDMI output to ensure the very best picture quality is delivered to late generation video display devices. At 1920 x 1080 pixels, picture quality is nothing less than stunning, revealing even background details in startling resolution that were often simply vague images in the past. Even if your TV monitor is not 1080P now, the advanced video scaling in the RVE-1070 will deliver a better picture than you currently receive.

The RDV-1092 provides all the disc-reading flexibility you could want: DVD-V for movies, DVD-A for superb high-resolution audio and even recordable discs like DVD-R and DVD-RW. SVCD and JPEG-format photo discs aren't left out either, nor are conventional music CDs or CD-R/RW discs – even those holding MP3 music files.

Any audio/video product's performance begins with its power supply and the RDV-1092 has been given special attention in this regard. A switching power supply, an advanced pulse circuit and individually regulated supply stages generate optimal voltages. Critical audio and video D/A converters are all wideband designs.

Features include variable and slow search, 6-step zoom play, strobe play, and resume functions. Plus, you'll find optical and coaxial digital audio outputs for easy connection to any system.

Video outputs include HDMI, composite, S-, and component video. Adaptive geometrical chroma mapping reduces unwanted picture artifacts while digital direct progressive scan (NTSC and PAL) lets you watch the best picture your monitor is capable of producing.

## SPECIFICATIONS

### Single play DVD

1080p Progressive Scan  
HDM1 Version 1.1

DVD-A 24 bit / 192khz sampling

DVD-Audio, CD, CDR, Video CD,  
MP3 compatible

Bi-directional RS232 interface

Composite, S-Video component  
output

Optical and coaxial digital outputs

6 channel analog outputs

12 volt trigger

W x H x D: 433 x 93 x 334 mm,  
17 1/8 x 3 3/8 x 13 1/8"

Shipping weight 5.1Kg 11.2 lbs.

Front panel height: 80 mm, 3.1"
